Resume Summary

Enthusiastic information technology graduate from the Technological Institute of the Philippines with experience in web development, mobile development, UI design, API, NPM, Git, and Agile. Intern as a mobile developer for the PASADA project of the Technological Institute of the Philippines, funded by DOST (Department of Science and Technology). I'm aspiring to be your next front-end developer for the company.

Pre-Professional Experience

Mobile Developer Intern

Technological Institute of the Philippines, Quezon City / Department of Science and Technology

January 2023 – May 2023

- Developed the PASADA mobile project that aims to lessen traffic accidents by assessing the driving skills and educational progress of bus and jeepney drivers.
- Utilized the Ionic framework with Angular framework to create a mobile application that can produce a cross-platform (iOS, Android) application using a single codebase.
- Designed the user interface, mockups, and wireframes of the application.
- Used an application programming interface (API) to communicate with the backend and establish a transactional system with a web application.
- Collaborated with project team members to implement the application's functionality.

Education

Bachelor of Science in Information Technology

Technological Institute of the Philippines, Quezon City

June 2019 - September 2023

Skills

- HTML5, CSS3, JavaScript, React.js, Typescript, NPM, Git, API, Tailwind CSS, Ionic, Angular, Node.js, SQL, and MySQL
- Analytical and problem-solving abilities
- Collaborative and able to work in teams
- Detail-oriented with a commitment to accuracy
- Excellent time management
- Strong communication and interpersonal skills
